

Let's put Smart St Neots on the map!

St Neots has an exciting opportunity to become one of the UK's leading 'smart' towns and we need your ideas to make it happen!

Our St Neots Smart Places Initiative is exploring 'smart' solutions to help to tackle some key challenges the town faces, in areas such as transport, environment, connectivity and information.

We want to work with local people to discover how data, emerging technology and digital connectivity can be used to support the continuing growth of this busy town.

We need your help to find out what's important for the community and how we can work together to come up with innovative ideas.

► **Turnover to see how you can share your ideas and comments**

The Smart St Neots project is being led by the Connecting Cambridgeshire programme in collaboration with local authorities, town councils and community groups.

Come and join us to share
