

Could you benefit from becoming more digitally included?

10 million people in the UK don't have basic digital skills.

Technology and digital are increasingly becoming part of modern everyday life. So it's essential that everyone has the support they need to engage properly online so that they don't miss out on the opportunities it can provide.

The Connecting Cambridgeshire programme is working across Cambridgeshire and Peterborough to ensure everyone has access to fast, reliable, future-proof connectivity - as well as supporting residents and businesses to become digitally included so they're aware of and don't miss out on the benefits of being online.

Digital inclusion can help to:

- improve socialisation and reduce loneliness
- improve healthcare engagement
- improve happiness and wellbeing
- improve education outcomes
- improve earning potential and employability
- reduce the cost of bills

If you'd like to hear more, visit the Wellbeing Hub in Littleport on **Wednesday 18th October between 9am-12pm** and drop in for a chat with the Digital Inclusion Lead for Connecting Cambridgeshire.

Location: **Youth and Community Centre adj. 29 Cornfield Lane, Littleport, CB6 1EX**
